Career Objective

MSc Data Science student with strong foundation in Machine Learning and Deep Learning. Skilled in classification algorithms such as k-Nearest Neighbor (kNN) and handling imbalanced datasets. Seeking opportunities to apply data science skills in real-world applications.

Education

Chanakya University

MSc Data Science (1st Semester)

CGPA: 7.85

Nagarjuna College of Management Studies

BSc Mathematics and Computer Science

CGPA: 7.68

Technical Skills

- Programming: Python, C
- Data Science: Machine Learning, Data Mining
- Algorithms: kNN, Logistic Regression, Decision Trees
- Tools: Jupiter Nootbook, Google Colab
- Web Technologies: HTML, CSS

Core Skills

- Supervised Learning
- Classification Techniques
- Model Evaluation: Accuracy, Precision, Recall, F1 Score
- Data Analysis and Problem Solving

Projects

Adaptive k-Nearest Neighbor for Imbalanced Text Classification

- Implemented adaptive kNN algorithm to handle imbalanced datasets
- Improved classification accuracy for minority classes
- Developed confidence-weighted extension for better predictions
- Applied machine learning and basic deep learning concepts
- Created HTML-based interactive demo for visualization
- Prepared IEEE research paper and presentation

Certifications

- Introduction to Deep Learning – Great Learning Academy (July 2023)
- Python Workshop – Government First Grade College, KR Puram (Nov 2023)

Soft Skills

- Communication
- Teamwork
- Problem Solving
- Analytical Thinking

Languages

- English
- Kannada
- Telugu

Declaration

I hereby declare that the above information is true to the best of my knowledge.
