

CAREER OBJECTIVE

Aspiring IT professional looking to work in a challenging position to use technical skills, problem-solving capabilities, and technological interest in creating effective while contributing to organizational growth and continuously enhancing my knowledge

EDUCATION

Master of Computer Applications(MCA) - Chanakya University Global Campus, Devanahalli, persuing

Bachelor of Computer Applications(BCA) - The National Degree College Bagepalli, 2025, CGPA-9.16

Pre-University Course(PUC) - Swami Vivekananda P U College Bagepalli, 2021, 70%

Secondary School Leaving Certificate(SSLC)- Government High School Bagepalli, 2019, 61%

TECHINCAL SKILLS

Programming Languages : C, Python

Tools : DBMS, MYSQL

Frameworks : Matplotlib, NumPy, Pandas

Platforms : Jupiter Notebook, Visual Studio Code

Version control system : Git and GitHub

Soft skills : Communication skills, Teamwork, Adaptability, Professional ethic

PROJECTS

AI Virtual Assistant

I am developing AI Virtual Assistant Using Python it recognizes user voice commands and provides relevant information based on the spoken input. The system uses speech recognition to convert voice into text, This project helps in hands-free interaction and.

CERTIFICATIONS

- Advance excel and Power BI
- DevOps Workshop

Internship

- Machine Learning Applications

Research Paper

My Research Paper Topic Is Enhancing Retail Profitability Through Ensemble-Based Sales Forecasting Using Random Forest Regression

Developed a machine learning-based sales forecasting model using Random Forest Regression on Superstore datasets. Performed data preprocessing, feature engineering, visualization, and predictive analytics achieving high forecasting accuracy ($R^2 \approx 0.9995$) using Python and Scikit-learn.
