

BAIRE GOWDA

bairegowdaappu@gmail.com | Bengaluru, Karnataka | 7975263501

SUMMARY

Motivated and detail-oriented MCA student with a strong academic foundation in Computer Applications gained through BCA and postgraduate studies. Possesses hands-on experience in Machine Learning projects involving Python, scikit-learn, and data analysis. Implemented KNN and HLKNN classifiers for cybersecurity applications including phishing detection. A quick learner with good problem-solving and communication skills, passionate about applying ML to real-world security challenges.

PROJECTS

KNN & HLKNN EXTENDED CLASSIFICATION STUDY	2026
<i>MCA Internal Assessment — Chanakya University Python, scikit-learn</i>	
- Implemented standard KNN and custom HLKNN (High-Level KNN) classifiers from scratch in Python using scikit-learn. - Evaluated on Iris dataset (K=5), Breast Cancer Wisconsin (K=7) and UCI Phishing Website Detection (K=5, cybersecurity). - HLKNN Results: 97.33% on Iris (+0.66%), 96.1% on Breast Cancer (+1.60%), 95.8% on Phishing (+2.10%) — largest gain on cybersecurity data. - Delivered 5 academic artifacts: IEEE-format extended paper, 12-slide PPT, HTML code report, Word summary, and Resume.	

HEART DISEASE PREDICTION SYSTEM	May 2025
<i>BCA Final Year Project Python, scikit-learn, Pandas</i>	
- Developed a machine learning-based system to predict heart disease using medical datasets. - Performed data preprocessing, feature analysis, and model implementation using Python. - Gained practical experience in data handling, analysis, and real-world problem-solving.	

EDUCATION

CHANAKYA UNIVERSITY	2025 – 2027
Master of Computer Applications (MCA)	
<i>Pursuing Specialization: Machine Learning & Cybersecurity</i>	
EAST POINT COLLEGE OF HIGHER EDUCATION	2022 – 2025
Bachelor of Computer Applications (BCA)	
<i>Completed CGPA: 7.8</i>	

CERTIFICATION

- Python for Beginners — Live Course provided by Great Learning Academy (2024) - Certification on Machine Learning & AI done at Hope Foundation, Bangalore (2024) - MCA Internal Assessment — ML Extended Study (KNN/HLKNN), Chanakya University (2026)	
---	--

TECHNICAL SKILLS

Programming Languages: Python, Java (Basics)	
ML Libraries & Frameworks: scikit-learn, NumPy, Pandas, Matplotlib, Seaborn	
ML Algorithms: KNN, HLKNN, Decision Trees, Naive Bayes, Logistic Regression	
ML Concepts: Supervised Learning, Cross-Validation, Feature Engineering, Model Evaluation	
Database Technologies: SQL, MySQL	
Web & Development Tools: HTML, CSS	
Tools: VS Code, Jupyter Notebook, Google Colab, Git
