

# DHEERAJ

Aspiring Data Scientist | MCA Data Science Student | BCA Graduate  
dheerajkharvi789@gmail.com | +91-7899504598 | Kundapura, Karnataka, India  
[linkedin.com/in/dheeraj-kharvi-ba23392b0](https://www.linkedin.com/in/dheeraj-kharvi-ba23392b0) | [github.com/dheerajkharvi789-ux](https://github.com/dheerajkharvi789-ux)

## PROFESSIONAL SUMMARY

Motivated Data Science aspirant with a BCA degree pursuing MCA in Data Science. Hands-on builder of AI-powered data applications, full-stack web systems, and data analysis tools. Developed DataLens AI — a universal BI dashboard powered by Gemini 2.0 Flash enabling natural language querying of any dataset. Proficient in Python, SQL, Streamlit, Django, Pandas, Plotly, and R. Certified in Data Analytics via Deloitte (Forage). Passionate about turning raw data into actionable insights through machine learning, data visualization, and intelligent application development.

## EDUCATION

|                                                                                                                                |             |
|--------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Master of Computer Applications (MCA) — Data Science</b>   Pursuing<br><i>Kundapura, Karnataka, India</i>                   | 2025 – 2027 |
| <b>Bachelor of Computer Application (BCA)</b>  <br><i>Bhandarkars' Arts &amp; Science College, Kundapura, Karnataka, India</i> | 2022 – 2025 |

## TECHNICAL SKILLS

**Programming Languages:** Python, R Programming, Java, PHP,HTML,CSS.  
**Data Science & AI:** Pandas, NumPy, Plotly, Matplotlib, Gemini 2.0 Flash API, NLP (Basic), Machine Learning  
**Data Analysis:** EDA, Data Cleaning, Data Wrangling, Statistical Analysis, Feature Engineering, Data Visualization  
**Web Frameworks:** Streamlit, Django, PHP (MVC), HTML, CSS, JavaScript.React  
**Databases:** MySQL, SQL, PL/SQL, DBMS, Data Modeling, Database Schema Design  
**Tools & Platforms:** Jupyter Notebook, Google Colab, VS Code, Git, REST APIs, MS Excel (Pivot Tables, VLOOKUP)  
**Core Competencies:** Business Intelligence, Dashboard Development, Statistical Modeling, Problem Solving, Analytical Thinking

## PROJECTS

- DataLens AI — Universal BI Dashboard** | Python, Streamlit, Pandas, Plotly, Gemini 2.0 Flash
- Built a full-stack AI-powered BI dashboard (1,457 lines, 35 functions) enabling non-technical users to upload any CSV/Excel and query it in plain English — no SQL or coding required.
  - Integrated Google Gemini 2.0 Flash via pure REST API to power NLP chat, auto-select chart types, and generate plain-English data insights with 83% chart accuracy.
  - Engineered a semantic Column Intelligence engine that auto-ranks columns by business importance across any domain (Sales, HR, Medical, Finance, Sports) at runtime — zero hardcoded assumptions.
  - Implemented 5 interactive chart types (Bar, Line, Histogram, Scatter, Pie) using Plotly with Gemini-driven chart selection, intent routing, and 3-retry offline fallback logic.
- Full-Stack University Website** | Django, Python, HTML, CSS, JavaScript, SQLite
- Designed a university web platform using Django MVC with reusable app modules for admissions, courses, faculty, and student portals; built dynamic pages with Django ORM and SQLite.
  - Implemented role-based access control (admin, faculty, student), secure authentication, session management, and a responsive cross-device frontend.
- Task Management System** | PHP, MySQL, HTML, CSS, JavaScript
- Built a full-stack role-based task app with separate manager/worker dashboards, normalized MySQL schema, and secure PHP session-based authentication and authorization.
- BuyerLens: Predictive E-Commerce Marketing Using Optimized KNN Learning**
- Built a KNN-based machine learning model to predict e-commerce customer purchase intentions using 12,330+ shopping sessions.
  - Performed data preprocessing, feature scaling, EDA, and hyperparameter tuning using GridSearchCV.
  - Achieved 75.75% prediction accuracy and evaluated performance using Precision, Recall, F1-Score, and ROC-AUC.

## CERTIFICATIONS & TRAINING

- Data Analytics Virtual Job Simulation** | Deloitte via Forage 2024
- Completed hands-on simulation covering data interpretation, dashboard creation, and insight communication using industry-standard analytics workflows.
  - Gained practical exposure to data analytics processes used by Big Four consulting professionals, reinforcing Python, Excel, and data storytelling skills.
- Diploma in Computer Financial Accounting**
- Acquired skills in computerized accounting systems, financial data management, and spreadsheet-based financial reporting.
- AI-Powered Python**
- Completed industry-oriented training program

## CORE COMPETENCIES & SOFT SKILLS

Analytical Thinking • Data-Driven Decision Making • Effective Communication • Problem-Solving • Critical Thinking • Teamwork & Collaboration • Leadership • Time Management • Attention to Detail • Continuous Learning
