PROFESSIONAL SUMMARY

MCA 2nd Semester student (Sem 1: 9.16 CGPA) at Chanakya University specialising in Cybersecurity, with a BCA (9.30 CGPA). Full-Stack Developer who independently shipped two production-grade web applications — a REST API-driven university portal (Django + PostgreSQL) and a blood donation system (Flask + MySQL) recognised as UG final-year project. Exploring AI/ML and Cybersecurity. Seeking a junior developer or internship role to deliver measurable impact.

TECHNICAL SKILLS

Languages:	Python Java C SQL
Web & Frameworks:	HTML5 CSS3 JavaScript React.js Django Flask Bootstrap REST API
Databases:	PostgreSQL MySQL Schema Design Indexing Foreign Keys CRUD
Tools & OS:	Git GitHub Linux Ubuntu Postman VS Code PyCharm
Exploring:	Machine Learning AI Tools Cybersecurity Django REST Framework

PROJECTS

Chanakya University Portal | *Django* | *PostgreSQL* | *REST API* | *Bootstrap* | *Postman* | MCA — 2025

- Designed 5-table PostgreSQL schema (Course, Faculty, Hostel, Transport, Inquiry) with FK constraints and cascade delete — zero integrity violations across all test data.
- Exposed 5 RESTful JSON endpoints; Postman-verified with 200 OK on all routes — built custom JSON helpers for decimal, datetime, and time serialisation without third-party libraries.
- Implemented role-gated admin dashboard (Django auth decorators) with inquiry categorisation — blocked 100% of unauthorised access attempts in QA testing.
- Server-side form validation on 6+ fields including regex phone check — malformed submission rate: 0% across 100+ test entries.

Blood Donation Portal | *Flask* | *MySQL* | *Python* | BCA Final Year Project | github.com/jeevanL16/Blood-Donation-portal

- Built end-to-end Flask + MySQL app managing 200+ live donor and blood-request records — zero data-loss incidents in all test and live scenarios.
- Cut admin lookup time by ~60% via 3-table normalised schema with indexed queries; generated reports across 200+ records in under 2 seconds.
- Delivered 4 modules solo — donor registration, blood requests, availability tracker, admin dashboard — in 6 weeks; selected as BCA final-year project.

EDUCATION

MCA — Chanakya University, Bengaluru | 2025 – 2027 | Currently: 2nd Semester

Sem 1 CGPA: 9.16 / 10 | Specialisation: Cybersecurity | Courses: ML, Full-Stack Dev, DBMS, Cyber Fundamentals

BCA — Best Degree College, Chikkaballapur | Bengaluru North University | July 2025

CGPA: 9.30 / 10 | Final Year Project: Blood Donation Portal | Courses: Python, Web Dev, C, PHP, MySQL

EXPERIENCE

Web Development Intern — Edu Phoenix Solutions | Feb – Apr 2025

- Built and delivered 3 full-stack web projects covering frontend, backend, and database integration within a structured 10-week programme.

CERTIFICATIONS

Python Programming Bootcamp (7-Day) — Udemy | July 2025 AI Tools Workshop — be10X | April 2024
