Profile

To secure an entry-level position in the industry where I can apply my skills and knowledge to contribute to the growth of the organization skilled in programming languages like Python, C, and PHP with excellent problem-solving skills and willingness to learn.

Education

Master of Computer Application Chanakya University Persuing....	2025 – 2027 Bengaluru,India
Bachelor of Computer Application Bhandarkars' Arts and Science college Kundapura, India 8.32 CGPA	2022 – 2025 Kundapura, India
EBAS Sri Sharada College Basrur 81.33%	2020 – 2022 Kundapura, India
SSLC Government Highschool Basrur 73.92%	2019 – 2020 Kundapura, India

Skills

Programming Languages : — Python, R Programming, Java, PHP, C

Data Science & AI : — Pandas, NumPy, Plotly, Matplotlib, Gemini 2.0 Flash API, NLP (Basic), Machine Learning

Data Analysis : — EDA, Data Cleaning, Data Wrangling, Statistical Analysis, Feature Engineering, Data Visualization

Web frameworks : — Streamlit, Django, PHP , HTML, CSS, JavaScript

Databases : — MySQL, SQL, PL/SQL, DBMS, Data Modeling, Database Schema Design

Tools & Platforms: — Jupyter Notebook, Google Colab, VS Code, Git, REST APIs, MS Excel (Pivot Tables, VLOOKUP)

Projects

To-Do List

PHP and MySQL

Designed and implemented the frontend using HTML, CSS, and JavaScript to create a user-friendly interface. Developed the backend logic using PHP to manage the manager and worker tasks. Implemented user authentication and authorization features. Designed and implemented the database schema using MySQL.

Smart Mobility for Mandya

Public transportation & Safety system

Smart Mobility for Mandya, Public Transportation & Safety System designed and implemented the application interface for a smart mobility system. Developed core features using AI tools for route assistance and system planning. Implemented real-time navigation and SOS safety functionality.

Full-Stack University Website

Designed a university web platform using Django MVC with reusable app modules for admissions, courses, faculty, and student portals; built dynamic pages with Django ORM and SQLite. Implemented role-based access control (admin, faculty, student), secure authentication, session management, and a responsive cross-device frontend.

Heart Disease Prediction Using Machine Learning

Developed a machine learning model for predicting heart disease using healthcare datasets. Performed data preprocessing, feature scaling, and exploratory data analysis using Python libraries. Implemented Logistic Regression for prediction and evaluated model performance using accuracy metrics. Visualized important medical factors and correlations using Matplotlib and Scikit-learn. Utilized Python, Pandas, NumPy, and Machine Learning techniques for end-to-end project development.

Certificates

Data Analytics job Simulation

PERSONAL SKILLS

- Quick Learner
- Time Management
- Team Worker
- Leadership Quality
