

Resume

Name: Swapna DN

REG.NO: 25PG00198

Email: swapnadm282004@gmail.com

Objective:

To apply my knowledge in Machine Learning and Cybersecurity to build intelligent systems for detecting network intrusions and improving security solutions.

Education

Master of computer Applications(MCA)

Chanakya university

Year:2026

Technical skills

Programming: Python

Machine Learning:

KNN, SVM, Random Forest, Decision Tree, Logistic Regression, Naive Bayes

Tools:

Google Colab, Jupyter Notebook

Concepts:

Intrusion Detection System (IDS), Data Preprocessing, Classification

Project

Intrusion Detection System using Machine Learning

- Developed a system to detect cyber attacks using ML algorithms
- Used NSL-KDD dataset

- Implemented KNN, SVM, Random Forest models
- Achieved highest accuracy using Random Forest (~98%)
- Performed binary and multi-class classification
- Compared performance based on accuracy and execution time

Tools and Technologies:

Python, Scikit-learn, Pandas, NumPy, Google Colab

Key Learning

- Learned machine learning application in cybersecurity
- Understood intrusion detection systems
- Gained practical experience with real datasets
- Improved analytical and problem-solving skills
