## PROFESSIONAL SUMMARY

Ambitious and versatile Software Developer currently pursuing MCA with specialization in Cybersecurity from Chanakya University. Holds a BCA (CGPA: 8.38) and brings hands-on experience in full-stack web development, machine learning, and network security. Passionate about building secure, scalable applications and contributing to cutting-edge research in cyber crime detection and IoT security.

## EDUCATION

### Master of Computer Applications (MCA) — Cybersecurity Chanakya University

Specialisation: Cybersecurity | Currently Pursuing

2025 – Present

### Bachelor of Computer Applications (BCA)

VVM's Shree Damodar College of Commerce and Economics, Goa

Final CGPA: 8.38 / 10.0

2022 – 2025

### Higher Secondary Certificate (HSSC) — Science

R.M.S Higher Secondary School

Percentage: 76%

2022

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C#, JavaScript

**Web Development:** HTML5, CSS3, Front-End Development, Back-End Development, Full Stack Development, Animation

**Mobile Development:** Mobile Application Development (Android/Cross-Platform)

**Data & ML:** Machine Learning, Data Structures & Algorithms, Database Management Systems (DBMS), KNN, SVM

**Cybersecurity:** Cryptography & Network Security, Cyber Security Fundamentals, IoT Security, CNS

**DevOps & Tools:** Git, GitHub, Jira, Selenium Testing, Linux, Computer Networking, Cisco Packet Tracer

**Productivity:** Calendar Management, Event Planning, Time Management, Communication Skills

## PROFESSIONAL EXPERIENCE

### College Project Leader — Final Year Project

Rentifyx | Remote/On-site

June 2024 – March 2025

- Developed and optimized the Rentifyx web platform, improving user experience and performance for rental businesses.
- Collaborated with a cross-functional team to design and implement responsive UI components for seamless navigation.
- Managed multiple parallel development tasks, ensuring on-time deployments and adherence to best coding practices.
- Conducted code reviews and maintained version control using Git, improving team collaboration and code quality.

## PROJECTS

### KNN-Based Cyber Crime Detection in IoT Networks

Machine Learning | Python | KNN/SVM | Kaggle Dataset

2024 – 2025

- Developed an original KNN-based machine learning model for detecting cyber crime patterns in IoT network traffic.

- Extended the research methodology from the paper 'SVM Classification and KNN Techniques for Cyber Crime Detection' using a custom Kaggle dataset.
- Implemented feature engineering, data preprocessing, and model evaluation (accuracy, precision, recall, F1-score).
- Achieved notable classification accuracy; documented findings and compared KNN and SVM performance metrics.

## Rentifyx — Rental Business Web Platform

2024 – 2025

### Full Stack Web Development | Responsive Design | UI/UX

- Led end-to-end development of a rental management platform serving small-to-medium rental businesses.
- Implemented intuitive UI components, dynamic routing, and backend integration for rental listing management.
- Optimized page load performance and ensured cross-device responsiveness using modern web standards.

## CERTIFICATIONS

---

- [Java for Beginners — Scaler Topics](#)
- [Introduction to Cisco Packet Tracer — Class Central / Cisco](#)
- [Cryptography Basics — Simplilearn SkillUp](#)
- [Types of Cyber Security — Great Learning Academy](#)
- [Introduction to Cyber Security — Great Learning Academy](#)

## ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

---

### Sports

- Cricket: Semi-finalist (1st Year), Runners-up (2nd Year), Ongoing Goa University Tournament (3rd Year)
- Baseball: Runners-up (2nd Year & 3rd Year)
- Appointed Sports Council Vice Captain — recognised for leadership and team coordination

### NCC & Cultural

- NCC: Earned B Certificate (A Grade), C Certificate; attended CATC & ATC Camps
- Active participant in college cultural events and Tech Trenz Club technical events

## RESEARCH REFERENCE

---

- Reference Paper: 'SVM Classification and KNN Techniques for Cyber Crime Detection' — Applied methodology to design an extended IoT-focused model using a Kaggle dataset, introducing an original KNN-based variant for IoT network intrusion scenarios.

## DECLARATION

---

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
